EXPERIENCE

Pantech Solutions

Intern | May 2023 - Jun 2023 | Online

AI Prompt Engineer

Python| Prompting

- Develop an AI chatbot using Python and prompting for interactive, context-aware conversations.

Slash Mark

Intern | Feb 2024 - May 2024 | Online

Frontend Developer

HTML | CSS | Java Script | SQL

- Developed Frontend Pages for Food Delivery web Application.

PROJECT(S)

Weather - web app

HTML| CSS| Java Script

- The Weather Web App provides state-specific forecasts and detailed weather conditions, including temperature, humidity, wind speed, and precipitation, via an interactive map. It serves residents, travelers, and businesses with up-to-date weather updates for precise planning.
- Role: Frontend Developer
- Web link: <https://weatherwebbs.netlify.app/>
- GitHub: <https://github.com/SandeepBuddabathina/weather-app>

Seekers - Angular Application

HTML| CSS| Type Script| Node JS | MongoDB

- An online exam system built with Angular for coding assessments and practice. It includes problem retrieval, session management, auto-save, and a built-in code editor. As a Frontend Developer, I developed and optimized the Exam and Practice components, ensuring dynamic problem retrieval and seamless code execution with Monaco Editor.
- Role: Frontend Developer

CERTIFICATIONS

Python Basic

: By Google (Coursera)

Frontend

: By Meta (Coursera)

SQL

: By Oracle Dev Gym
